Sobre la ponente:

Dr Goua is the academic strategic lead or biological science at the School of Pharmacy and Life Sciences.

Her key research interests include the effects of nutrients, natural product extracts and novel compounds on cardiovascular disease (atherosclerosis) and cancer. She mainly lectures on subjects related to molecular and cellular biology, and is involved in Honours project supervision for Biomedical Science and Biosciences BSc (Hons). Dr Goua also is actively involved in student recruitment under the 2+2 degree link scheme with the Colleges and with universities across Europe.
